Directors' Responsibilities and Approval

The directors are required in terms of the Companies Act of South Africa to maintain adequate accounting records and are responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is their responsibility to ensure that the annual financial statements fairly present the state of affairs of the company as at the end of the year end and the results of its operations and cash flows for the period then ended, in conformity with International Financial Reporting Standards. The external auditors are engaged to express an independent opinion on the annual financial statements.

The annual financial statements are prepared in accordance with International Financial Reporting Standards and are based upon appropriate accounting policies consistently applied supported by reasonable and prudent judgements and estimates.

The directors acknowledge that they are ultimately responsible for the system of internal financial control established by the company and place considerable importance on maintaining a strong control environment. To enable the directors to meet these responsibilities, the directors set standards for internal control aimed at reducing the risk of error or loss in a cost-effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the company and all employees are required to maintain the highest ethical standards in ensuring the company's business is conducted in a manner that in all reasonable circumstances are above reproach. The focus of risk management in the company is on identifying, assessing, managing and monitoring all known forms of risk across the company. While operating risk cannot be fully eliminated, the company endeavours to minimize it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The directors are of the opinion, based on the information and explanations given by management that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or loss.

The directors have reviewed the company's cash flow forecast for the year 31 March 2024 and, in the light of this review and the current financial position, they are satisfied that the company has or has access to adequate resources to continue in operational existence for the foreseeable future.

The external auditors are responsible for independently auditing and reporting on the company's annual financial statements. The annual financial statements have been examined by the company's external auditors and their report is presented on pages 6 to 8.

The external auditors were given unrestricted access to all financial records and related data, including minutes of all meetings of shareholders, the board of directors and committees of the board. The directors believe that all representations made to the independent auditors during their audit are valid and appropriate.

The annual financial statements set out on pages 9 to 49 which have been prepared on the going concern basis, were approved by the directors on 27th October 2023 and are signed on its behalf by:

Director
Bharat Kumar Garg

Director
Amit Bhakri

Director

3. Going concern

The directors believe that the company has adequate financial resources to continue in operation for the foreseeable future and accordingly the annual financial statements have been prepared on a going concern basis. The directors have satisfied themselves that the company is in a sound financial position and that it has access to sufficient borrowing facilities to meet its foreseeable cash requirements. The directors are not aware of any new material changes that may adversely impact the company. The directors are also not aware of any material non-compliance with statutory or regulatory requirements or of any pending changes to legislation which may affect the company.

4. Events after the reporting period

The directors are not aware of any other matter or circumstance arising since the end of the reporting period that would materially impact the annual financial statements.

5. Directors' interest in contracts

The directors have no interest in contracts for the current period under review.

Directors' Report

6. Authorised and issued share capital

There were no changes in the authorised or issued share capital of the company during the year under review.

7. Dividends

No dividend has been declared during the financial year 2022-23 (2021-22: NIL)

8. Directors

The directors of the company during the year and to the date of this report are as follows:

Name	Nationality
Bharat Kumar Garg	Australian
Amit Bhakri	Indian
Yerisha Naidoo	South African (Resigned on 12 th Sep 2023)
Jerusha Moodley Dass	South African (Joined on 12 th Sep 2023)

9. Secretary

The secretary of the company is YS Rademan of:

Business address	7 Forbes Street Midstream Estate 1692
Postal address	PO Box 2660 Brooklyn Square Pretoria 0075

10. Holding company

The company's holding company is MSSL Mauritius Holdings Limited incorporated in Mauritius.

11. Ultimate holding company

The company's ultimate holding company is Samvardhana Motherson International Limited (Formerly Motherson Sumi Systems Limited) incorporated in India.

12. Auditors

Ernst & Young Inc. will continue in office in accordance with section 90 of the Companies Act of South Africa.

13. Liquidity and solvency

The directors have performed the required liquidity and solvency tests required by the Companies Act of South Africa.

Independent Auditor's Report

To the Shareholders of MSSL Global RSA Module Engineering Limited

Report on the Audit of the Annual Financial Statements

Opinion

We have audited the annual financial statements of MSSL Global RSA Module Engineering Limited ('the company') set out on pages 9 to 49, which comprise the statement of financial position as at 31 March 2023, and the statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the annual financial statements, including a summary of significant accounting policies.

In our opinion, the annual financial statements present fairly, in all material respects, the financial position of MSSL Global RSA Module Engineering Limited as at 31 March 2023, and its financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards and the requirements of the Companies Act of South Africa.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Annual Financial Statements section of our report. We are independent of the company in accordance with the Independent Regulatory Board for Auditors' Code of Professional Conduct for Registered Auditors (IRBA Code) and other independence requirements applicable to performing audits of financial statements of the company and in South Africa. We have fulfilled our other ethical responsibilities in accordance with the IRBA Code and in accordance with other ethical requirements applicable to performing audits of the company and in South Africa. The IRBA Code is consistent with the corresponding sections of the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards). We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

The directors are responsible for the other information. The other information comprises the information included in the 49 page document titled: "MSSL Global RSA Module Engineering Limited Annual Financial Statements for the year ended 31 March 2023", which includes the Directors' Report as required by the Companies Act of South Africa. The other information does not include the annual financial statements and our auditor's report thereon.

Our opinion on the annual financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the annual financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the annual financial statements, or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for Annual Financial Statements

The directors are responsible for the preparation and fair presentation of the annual financial statements in accordance with International Financial Reporting Standards and the requirements of the Companies Act of South Africa, and for such internal control as the directors determine is necessary to enable the preparation of annual financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the annual financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Annual Financial Statements

Our objectives are to obtain reasonable assurance about whether the annual financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these annual financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the annual financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the annual financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the annual financial statements, including the disclosures, and whether the annual financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

MSSL Global RSA Module Engineering Limited
(Registration Number: 2009/010528/06)
Annual Financial Statements for the year ended 31 March 2023

Accounting policies

1. Basis of preparation

The annual financial statements have been prepared in accordance with International Financial Reporting Standards, and the Companies Act of South Africa. The annual financial statements have been prepared on the historical cost basis, except for certain financial instruments that are measured at fair value and incorporate the principal accounting policies set out below. They are presented in South African Rands.

These accounting policies are consistent with the previous period.

1.1 Significant judgements and sources of estimation uncertainty

In preparing the annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the annual financial statements.

Significant judgements include:

Taxation

Judgement is required in determining the provision for income taxes due to the complexity of legislation. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The company recognises liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

The company recognises the net future tax benefit related to deferred income tax assets to the extent that it is probable that the deductible temporary differences will reverse in the foreseeable future. Assessing the recoverability of deferred income tax assets requires the company to make significant estimates related to expectations of future taxable income. Estimates of future taxable income are based on forecast cash flows from operations and the application of existing tax laws. To the extent that future cash flows and taxable income differ significantly from estimates, the ability of the company to realise the net deferred tax assets recorded at the end of the reporting period could be impacted.

Trade receivables

The company assessed its trade receivables for impairment at the end of each reporting period. In determining whether an impairment loss should be recorded in profit or loss, the company makes judgements as to whether there is observable data indicating a measurable decrease in the estimated future cash flows from a financial asset.

Residual values and useful lives of plant and equipment

The directors reviewed the residual values, useful lives and carrying amount of its plant and equipment to determine the appropriate level of depreciation and whether there is any indication that those assets have suffered an impairment loss. The directors judged a residual value of zero as a result of the fact that furniture and equipment are held for trading and are normally scrapped.

Impairment testing

The company reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. Assets are grouped at the lowest level for which identifiable cash flows are largely independent of cash flows of other assets and liabilities. If there are indications that impairment may have occurred, estimates are prepared for expected future cash flows for each group of assets.

MSSL Global RSA Module Engineering Limited
(Registration Number: 2009/010528/06)
Annual Financial Statements for the year ended 31 March 2023

Accounting policies

1.1 Significant judgements and sources of estimation uncertainty (Continued)

Provisions

Provisions were raised, and management determined an estimate based on the information available.

1.2 Property, Plant and Equipment

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits associated with the item will flow to the company; and
- the cost of the item can be measured reliably.

Property, plant and equipment is initially measured at cost.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to profit or loss during the financial period in which they are incurred.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the entity is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Major spare parts and stand by equipment which are expected to be used for more than one period are included in property, plant and equipment. In addition, spare parts and stand by equipment which can only be used in connection with an item of property, plant and equipment are accounted for as property, plant and equipment.

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspections are derecognised.

Land is not depreciated. Property, plant and equipment is depreciated on the straight-line basis over its expected useful lives to the estimated residual value.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

The useful lives of items of property, plant and equipment have been assessed as follows:

Item	Average useful life
Buildings	20 years
Plant and equipment	10 years
Furniture and fittings	6 years
Office equipment	10 years
Generators	10 years
Computer equipment	3 years
Moulds and dies	6.17 years
Electrical installation	10 years
Factory equipment	10 years

Capital work in progress is reflected at cost and is only depreciated once available for use as intended by management.

The residual value, useful life and depreciation method of each asset is reviewed, and adjusted if appropriate, at the end of each reporting period. If the expectations differ from previous estimates, the change is accounted for as a change in accounting estimate.

MSSL Global RSA Module Engineering Limited
(Registration Number: 2009/010528/06)
Annual Financial Statements for the year ended 31 March 2023

Accounting policies

1.2 Property, Plant and Equipment (Continued)

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation charge for each period is recognised in profit or loss unless it is included in the carrying amount of another asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in profit or loss when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

1.3 Intangible Assets

An intangible asset is recognised when:

- it is probable that the expected future economic benefits that are attributable to the asset will flow to the entity; and the
- cost of the asset can be measured reliably.

Intangible assets are initially recognised at cost.

An intangible asset arising from development (or from the development phase of an internal project) is recognised when:

- it is technically feasible to complete the asset so that it will be available for use or sale.
- there is an intention to complete and use or sell it.
- there is an ability to use or sell it.
- it will generate probable future economic benefits.
- there are available technical, financial and other resources to complete the development and to use or sell the asset.
- the expenditure attributable to the asset during its development can be measured reliably.

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight-line basis over their useful life.

The amortisation period and the amortisation method for intangible assets are reviewed every period-end.

Reassessing the useful life of an intangible asset with a finite useful life, after it was classified as indefinite is an indicator that the asset may be impaired. As a result, the asset is tested for impairment and the remaining carrying amount is amortised over its useful life.

Amortisation is provided to write down the intangible assets, on a straight-line basis, to their residual values as follows:

Item	Useful life
Computer software	3 Years

Annual Financial Statements for the year ended 31 March 2023

Accounting policies

1.4 Financial instruments

Classification

The company classifies financial assets and financial liabilities into the following categories:

- Loans and receivables
- Financial liabilities measured at amortised cost

Classification depends on the purpose for which the financial instruments were obtained / incurred and takes place at initial recognition. Classification is re-assessed on an annual basis, except for derivatives and financial assets designated as at fair value through profit or loss, which shall not be classified out of the fair value through profit or loss category.

Initial recognition and measurement

Financial instruments are recognised initially when the company becomes a party to the contractual provisions of the instruments.

The company classifies financial instruments, or their component parts, on initial recognition as a financial asset, a financial liability or an equity instrument in accordance with the substance of the contractual arrangement.

Financial instruments are measured initially at fair value, except for equity investments for which a fair value is not determinable, which are measured at cost and are classified as available-for-sale financial assets.

For financial instruments which are not at fair value through profit or loss, transaction costs are included in the initial measurement of the instrument.

Subsequent measurement

Loans and receivables are subsequently measured at amortised cost, using the effective interest method, less accumulated impairment losses.

Available-for-sale financial assets are subsequently measured at fair value. This excludes equity investments for which a fair value is not determinable, which are measured at cost less accumulated impairment losses.

Gains and losses arising from changes in fair value are recognised in other comprehensive income and accumulated in equity until the asset is disposed of or determined to be impaired. Interest on available-for-sale financial assets calculated using the effective interest method is recognised in profit or loss as other income. Dividends received on available-for-sale equity instruments are recognised in profit or loss as other income when the company's right to receive payment is established.

Changes in fair value of available-for-sale financial assets denominated in a foreign currency are analysed between translation differences resulting from changes in amortised cost and other changes in the carrying amount. Translation differences on monetary items are recognised in profit or loss while translation differences on non-monetary items are recognised in other comprehensive income and accumulated in equity.

Financial liabilities at amortised cost are subsequently measured at amortised cost, using the effective interest method.

Loans to and from group companies

These include loans from the holding company and is recognised initially at fair value plus direct transaction costs. Loans from group companies are classified as financial liabilities measured at amortised cost.

(Registration Number: 2009/010528/06)
Annual Financial Statements for the year ended 31 March 2023

Accounting policies

1.4 Financial instruments (Continued)

Trade and other receivables

Trade receivables are measured at initial recognition at fair value and are subsequently measured at amortised cost using the effective interest rate method. Appropriate allowances for estimated irrecoverable amounts are recognised in profit or loss when there is objective evidence that the asset is impaired. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation, and default or delinquency in payments (more than 30 days overdue) are considered indicators that the trade receivable is impaired. The allowance recognised is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the effective interest rate computed at initial recognition.

Trade and other receivables

The carrying amount of the asset is reduced through the use of an allowance account, and the amount of the loss is recognised in profit or loss within operating expenses. When a trade receivable is uncollectable, it is written off against the allowance account for trade receivables. Subsequent recoveries of amounts previously written off are credited against operating expenses in profit or loss.

Trade and other receivables are classified as loans and receivables.

Trade and other payables

Trade payables are initially measured at fair value, and are subsequently measured at amortised cost, using the effective interest rate method.

Cash and cash equivalents

Cash and cash equivalents comprise cash on hand and demand deposits and other short-term highly liquid investments that are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value. These are initially and subsequently recorded at fair value.

1.5 Income tax

Current income tax assets and liabilities

Current income tax for current and prior periods is, to the extent unpaid, recognised as a liability. If the amount already paid in respect of current and prior periods exceeds the amount due for those periods, the excess is recognised as an asset.

Current income tax liabilities (assets) for the current and prior periods are measured at the amount expected to be paid to (recovered from) the tax authorities, using the tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulations is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax assets and liabilities

A deferred tax liability is recognised for all taxable temporary differences, except to the extent that the deferred tax liability arises from the initial recognition of an asset or liability in a transaction which at the time of the transaction, affects neither accounting profit nor taxable profit (tax loss).

MSSL Global RSA Module Engineering Limited
(Registration Number: 2009/010528/06)
Annual Financial Statements for the year ended 31 March 2023

Accounting policies

1.5 Income tax (Continued)

A deferred tax asset is recognised for all deductible temporary differences to the extent that it is probable that taxable profit will be available against which the deductible temporary difference can be utilised. A deferred tax asset is not recognised when it arises from the initial recognition of an asset or liability in a transaction at the time of the transaction, affects neither accounting profit nor taxable profit (tax loss).

A deferred tax asset is recognised for the carry forward of unused tax losses to the extent that it is probable that future taxable profit will be available against which the unused tax losses can be utilised.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised, or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Income tax expenses

Current and deferred taxes are recognised as income or an expense and included in profit or loss for the period, except to the extent that the tax arises from:

- a transaction or event which is recognised, in the same or a different period, to other comprehensive income, or
- a business combination

Current tax and deferred taxes are charged or credited to other comprehensive income if the tax relates to items that are credited or charged, in the same or a different period, to other comprehensive income.

Current tax and deferred taxes are charged or credited directly to equity if the tax relates to items that are credited or charged, in the same or a different period, directly in equity.

1.6 Leases

The company has applied IFRS 16 using the modification retrospective approach and therefore the comparative information has not been restated and continues to be reported under IAS 17 and IFRIC 4 are disclosed separately if they are different from those under IFRS 16 and the impact of changes is disclosed in Notes 27.

A. Significant accounting policy

Policy applicable from 1 January 2019

At inception of a contract, the company assesses whether a contract is, or contains, a lease. A contract is or contains, a lease if the contract conveys the right to control the use of an identified assets for a period of time in exchange for the consideration. To assess whether a contract conveys the right to control the use of an identified assets, the company assesses whether.

- the contract involves the use of an identified asset- this may be specified explicitly or implicitly and should be physically distinct or represent substantially all of the capacity of a physically distinct asset. If the supplier has a substantive substitution right, then the asset is not identified:
- the company has the right to obtain substantially all of the economic benefits from use of the asset throughout the period of use: and
- the company has the right to direct the use of the assets. The company has this right when it has the decision-making rights that are most relevant to changing how and for what purpose the asset is used. In rare case where the decision about how and for what purpose the asset is used is predetermined, the company has the right to direct the use of the asset if either:
- the company has the right to operate the asset: or
- the company designed the asset in a way that predetermines how and for what purpose it will be used.

This policy is applied to contracts entered into, or changed, on or after 1 January 2019.

At inception or on reassessment of a contract that contains a lease component, the company allocates the consideration in the contract to each lease component on the basis of their relative stand-alone prices. However, for the leases of land and building in which it is a lessee, the company has elected not to separate non-lease components and account for the lease and non-lease components as a single lease component.

MSSL Global RSA Module Engineering Limited
(Registration Number: 2009/010528/06)
Annual Financial Statements for the year ended 31 March 2023

Accounting policies

Policy applicable from 1 January 2019

For contracts entered into before 1 January 2019, the company determined whether the arrangement was or contained a lease based on the assessment of whether:

Fulfilment of the arrangement was dependent on the use of a specific asset or assets; and

- The arrangement has conveyed a right to use the asset. An arrangement conveyed the right to use the asset if one of the following was met:
- The purchaser has the ability or right to control physical access to the asset while obtaining or controlling more than an insignificant amount of the output; or
- Facts and circumstances indicated that it was remote that other parties would take more than an insignificant amount of the output, and the price per unit was neither fixed per unit of output nor equal to the current market price per unit of output.

1.7 Inventories

Inventories are stated at lower of cost and net realisable value. Cost is determined using the weighted average method. The cost of finished goods and work in progress comprises raw materials, direct labour, other direct costs and related production overhead. Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale.

1.8 Share capital and equity

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities.

1.9 Impairment of non-financial assets

The company assesses at each end of the reporting period whether there is any indication that an asset may be impaired. If any such indication exists, the company estimates the recoverable amount of the asset:

- tests intangible assets with an indefinite useful life or intangible assets not yet available for use for impairment annually by comparing its carrying amount with its recoverable amount. This impairment test is performed during the annual period and at the same time every period.
- tests goodwill acquired in a business combination for impairment annually.

If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the recoverable amount of the cash-generating unit to which the asset belongs is determined.

The recoverable amount of an asset or a cash-generating unit is the higher of its fair value less costs to sell and its value in use.

If the recoverable amount of an asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. That reduction is an impairment loss.

An impairment loss of assets carried at cost less any accumulated depreciation or amortisation is recognised immediately in profit or loss. Any impairment loss of a revalued asset is treated as a revaluation decrease.

An entity assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for assets other than goodwill may no longer exist or may have decreased. If any such indication exists, the recoverable amounts of those assets are estimated.

The increased carrying amount of an asset other than goodwill attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior periods.

MSSL Global RSA Module Engineering Limited
(Registration Number: 2009/010528/06)
Annual Financial Statements for the year ended 31 March 2023

Accounting policies

A reversal of an impairment loss of assets carried at cost less accumulated depreciation or amortisation other than goodwill is recognised immediately in profit or loss. Any reversal of an impairment loss of a re-valued asset is treated as a revaluation increase.

1.10 Government grants

Government grants are recognised when there is reasonable assurance that:

- the company will comply with the conditions attaching to them; and
- the grants will be received.

Government grants are recognised as income over the periods necessary to match them with the related costs that they are intended to compensate.

A government grant that becomes receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the entity with no future related costs is recognised as income during the period in which it becomes receivable.

Government grants related to assets, including non-monetary grants at fair value, are presented in the statement of financial position by setting up the grant as deferred income.

Repayment of a grant related to income is applied first against any un-amortised deferred credit set up in respect of the grant. To the extent that the repayment exceeds any such deferred credit, or where no deferred credit exists, the repayment is recognised immediately as an expense.

Repayment of a grant related to an asset is recorded by increasing the carrying amount of the asset or reducing the deferred income balance by the amount repayable. The cumulative additional depreciation that would have been recognised to date as an expense in the absence of the grant is recognised immediately as an expense.

1.11 Employee benefits

Short-term employee benefits

The cost of short-term employee benefits, (those that are expected to be settled wholly before 12 months after the end of the annual reporting period in which the employees render the related service), are recognised in the period on which the service is rendered and are not discounted.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs.

The expected cost of profit sharing and bonus payments is recognised as an expense when there is a legal or constructive obligation to make such payments as a result of past performance.

Accounting policies

1.12 Provisions and contingencies

Provisions are recognised when:

- the company has a present obligation as a result of a past event.
- it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the present value of the expenditure expected to be required to settle the obligation.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement shall be recognised when, and only when, it is virtually certain that reimbursement will be received if the entity settles the obligation. The reimbursement shall be treated as a separate asset. The amount recognised for the reimbursement shall not exceed the amount of the provision.

Provisions are not recognised for future operating losses.

If an entity has a contract that is onerous, the present obligation under the contract shall be recognised and measured as a provision.

Annual Financial Statements for the year ended 31 March 2023

Accounting policies

1.13 Revenue

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- the company has transferred to the buyer the significant risks and rewards of ownership of the goods;
- the company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits associated with the transaction will flow to the company; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Revenue is measured at the fair value of the consideration received or receivable and represents the amounts receivable for goods and services provided in the normal course of business, net of trade discounts and volume rebates, and value added tax.

Revenue is earned from two separate revenue streams:

1) Tooling revenue

The Company applies the 'percentage of completion method' to determine the appropriate amount to recognize in a given period. The Company determines the stage of completion on the basis of milestones achieved to date. When the outcome of a contract can be estimated reliably, and it is probable that the contract will be profitable, contract revenue is recognised over the period of the contract by reference to the stage of completion. Contract costs are recognised as expenses by reference to the stage of completion of the contract activity at the end of the reporting period. When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognised as an expense immediately. Revenue is recognised only to the extent of contract costs incurred that is probable to be recoverable. The company does not recognize profit on booking of such revenue ("Zero profit margin method") the costs include all expenses incurred in direct relation to the specific projects and a proportion of the fixed and variable general costs incurred on the basis of normal capacity for the Company's contracts. On the balance sheet, the Company reports the net contract position for each contract as either an asset or a liability. A contract represents an asset where costs incurred plus recognised profits (less recognised losses) exceed progress billings; a contract represents a liability where the opposite is the case.

Deferred revenue

Deferred revenue is earned from the sale of tools to contract customers. The deferred revenue is recognised per the conditions and terms as set out in the customer contracts. Balances will be transferred from deferred revenue to revenue on the passing of risks and rewards to the contract customers per the revenue recognition criteria above.

2) Component revenue

Component revenue is earned from the manufacture and supply of motor vehicle components to the various contract customers. The risks and rewards of ownership are transferred to the customer on delivery of the components to the customers' premises.

All recognition criteria are applied when accounting for both revenue streams per the conditions above.

Interest is recognised, in profit or loss, using the effective interest rate method.

Accounting policies

1.14 Borrowing costs

Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalised as part of the cost of that asset until such time as the asset is ready for its intended use. The amount of borrowing costs eligible for capitalisation is determined as follows:

- Actual borrowing costs on funds specifically borrowed for the purpose of obtaining a qualifying asset less any temporary investment of those borrowings.
- Weighted average of the borrowing costs applicable to the entity on funds generally borrowed for the purpose of obtaining a qualifying asset. The borrowing costs capitalised do not exceed the total borrowing costs incurred.

The capitalisation of borrowing costs commences when:

- expenditures for the asset have occurred
- borrowing costs have been incurred, and
- activities that are necessary to prepare the asset for its intended use or sale are in progress.

Capitalisation is suspended during extended periods in which active development is interrupted.

Capitalisation ceases when substantially all the activities necessary to prepare the qualifying asset for its intended use or sale are complete.

All other borrowing costs are recognised as an expense in the period in which they are incurred.

1.15 Translation of foreign currencies

Foreign currency transactions

A foreign currency transaction is recorded, on initial recognition in Rands, by applying to the foreign currency amount the spot exchange rate between the functional currency and the foreign currency at the date of the transaction.

At the end of the reporting period:

- foreign currency monetary items are translated using the closing rate;
- non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of the transaction; and
- non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were translated on initial recognition during the period or in previous annual financial statements are recognised in profit or loss in the period in which they arise.

When a gain or loss on a non-monetary item is recognised to other comprehensive income and accumulated in equity, any exchange component of that gain or loss is recognised to other comprehensive income and accumulated in equity. When a gain or loss on a non-monetary item is recognised in profit or loss, any exchange component of that gain or loss is recognised in profit or loss.

Cash flows arising from transactions in a foreign currency are recorded in Rands by applying to the foreign currency amount the exchange rate between the Rand and the foreign currency at the date of the cash flow.

2. Standards and Interpretations

Accounting policy developments include new standards issued, amendments to standards, and interpretations issued on current standards as issued by the IASB.

- a) Standards, amendments and interpretations effective for the first time
Standards and amendments adopted by the company:
The company has applied the following standards and amendments for the first time for the annual reporting period commencing 1 January 2021.
- COVID-19-Related Rent Concessions beyond 30 June 2021 (Amendments to IFRS 16);
 - Property, Plant and Equipment: Proceeds before Intended Use – Amendments to IAS 16
 - Onerous Contracts – Cost of Fulfilling a Contract – Amendments to IAS 37
 - Annual Improvements to IFRS Standards 2018-2020, and
 - Reference to the Conceptual Framework – Amendments to IFRS 3.
- These amendments did not have any impact on amounts recognised in prior periods and are not expected to significantly affect current or future periods.
- b) Standards, amendments and interpretations not yet effective but have been early adopted by the company
Certain new accounting standards and interpretations have been published that are not mandatory for 31 March 2023 reporting periods and have not been early adopted by the company.
- IFRS 17 Insurance contracts
 - Definition of Accounting Estimates – Amendments to IAS 8
 - Disclosure of Accounting Policies – Amendments to IAS 1 and IFRS Practice Statement 2
 - Deferred Tax related to Assets and Liabilities arising from a single transaction – Amendments to IAS 12
 - Lease Liability in a Sale and Leaseback – Amendments to IFRS 16
 - Classification of Liabilities as Current or Non-current – Amendments to IAS 1

These standards are not expected to have a material impact on the entity in the current or future reporting periods and on foreseeable future transactions. The amendments apply from 1 January 2023.

3. Risk management

Capital risk management

The company's objectives when managing capital are to safeguard the company's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

The capital structure of the company consists of debt, which includes the borrowings (excluding derivative financial liabilities) disclosed in note 12, cash and cash equivalents disclosed in note 10, and equity as disclosed in the statement of financial position.

In order to maintain or adjust the capital structure, the company may adjust the amounts of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

There are no externally imposed capital requirements.

MSSL Global RSA Module Engineering Limited
(Registration Number: 2009/010528/06)
Annual Financial Statements for the year ended 31 March 2023

Notes to the annual financial statements

Financial risk management

The company's activities expose it to a variety of financial risks: market risk (including currency risk, fair value interest rate risk and cash flow interest rate risk), credit risk and liquidity risk.

The company's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the company's financial performance. Risk management is carried out by a central treasury department (group treasury) under policies approved by the ultimate holding company's board of directors. Group treasury identifies, evaluates and hedges financial risks in close co-operation with the group's operating units. The directors provide written principles for overall risk management, as well as written policies covering specific areas, such as foreign exchange risk, interest rate risk, credit risk, use of derivative financial instruments and non-derivative financial instruments, and investment of excess liquidity.

3. Risk management

Liquidity risk

Cash flow forecasting is performed in the operating segments of the company and aggregated by company finance. Company finance monitors rolling forecasts of the company's liquidity requirements to ensure it has sufficient cash to meet operational needs while maintaining sufficient headroom on its undrawn committed borrowing facilities at all times so that the company does not breach borrowing limits or covenants (where applicable) on any of its borrowing facilities. Such forecasting takes into consideration the company's debt financing plans, covenant compliance, compliance with internal statement of financial position ratio targets and, if applicable external regulatory or legal requirements — for example, currency restrictions.

The table below analyses the company's non-derivative financial liabilities into relevant maturity groupings based on the remaining period at the statement of financial position date to the contractual maturity date. Derivative financial liabilities are included in the analysis if their contractual maturities are essential for an understanding of the timing of the cash flows. The amounts disclosed in the table are the contractual undiscounted cash flows.

Annual Financial Statements for the year ended 31 March 2023

Notes to the annual financial statements

3. Risk management (Continued)

	Less than 1 year	Between 1 and 5 years
As at 31 March 2023		
Trade and other payables	907 271 846	-
As at 31 March 2022		
Trade and other payables	428 194 449	-

Interest rate risk

The company's interest rate risk arises from long-term borrowings. Borrowings issued at variable rates expose the company to cash flow interest rate risk. The cash received from borrowings is managed to ensure funds are invested in a manner to achieve maximum returns whilst minimising risks. The scenarios are run only for liabilities that represent the major interest-bearing positions. During the year the company had repaid the entire loan due to which there is no interest rate risk.

Notes to the annual financial statements

Credit risk

Credit risk consists mainly of cash deposits, cash equivalents, derivative financial instruments and trade debtors. The company only deposits cash with major banks with high quality credit standing and limits exposure to any one counterparty. Trade receivables comprise a widespread customer base. Management evaluated credit risk relating to customers on an ongoing basis. If customers are independently rated, these ratings are used.

Foreign exchange risk

The company operates internationally and is exposed to foreign exchange risk arising from various currency exposures, primarily with respect to the US dollar. Foreign exchange risk arises from future commercial transactions, recognised assets and liabilities. The company does not hedge foreign exchange fluctuations.

3. Risk management (Continued)

Sensitivity analysis

The company analyses its interest rate exposure. The company calculates the impact on profit and loss by simulating scenarios of interest rate shifts. These are done only for major interest-bearing liabilities. Since the long-term borrowings were settled during the year this sensitivity would have zero effect.

The following table reflects the market value of the company's assets and liabilities at year end in other currencies.

The carrying amount of trade and other receivables are denominated in the following currencies:

Rand	809 331 941	834 577 892
US Dollar	62 864 576	-
	<u>872 196 517</u>	<u>834 577 892</u>

The carrying amount of trade and other payables are denominated in the following currencies:

Rand	211 080 288	89 220 687
Euro	10 890 776	3 583 192

Company has lease contracts for Land and various items of Plant and Machinery, Vehicles and other equipment used in its operations.

Lease of Land has lease terms of 20 years, Leases of plant and machinery generally have lease terms between 2 and 5 years, while motor vehicles and other equipment generally have lease terms between 3 and 5 years.

The Company's obligations under its leases are secured by the lessor's title to the leased assets. Generally, the Company is restricted from assigning and subleasing the leased assets.

There are several lease contracts that include extension and termination options and variable lease payments. The company also have certain leases of office equipment with low value.

Fair value of trade and other receivables			
Trade and other receivables		872 196 517	834 577 892

The maximum exposure to credit risk at the reporting date is the fair value of each class of receivable mentioned above. The company does not hold any collateral as security.

Due to the short-term nature of the current receivables, their carrying amount is assumed to be the same as their fair value. The effect of discounting is negligible. The fair values are classified as level 3 fair values in the fair value hierarchy due to the inclusion of unobservable inputs, including counterparty credit risk.

Trade and other receivables past due but not impaired

Trade and other receivables which are less than 3 months past due are not considered to be impaired. At 31 March 2023, R1 476 170 (31st March 2022: R1 476 170) were past due but not impaired.

19. Deferred income (Continued)			
Government grant:			
The government grant relates to the Automotive Incentive Scheme (AIS). The maximum grant is for R83 300 000 (2017: R83 300 000), assuming a projected maximum qualifying investment amount of R238 000 000. (2018: R41 847 000), assuming a projected maximum qualifying investment amount of R139 490 000. (2019: R30 000 000), assuming a projected maximum qualifying investment amount of R120 000 000. The approval is conditional to meeting the requirements of the AIS. One of the requirements of the AIS, is that a claim form be submitted to the DTI for evaluation, after which the grant would be paid. As at 31 March 2021, approval 1, approval 2, approval 3, approval 4, approval 5 and approval 6 were fully paid by DTI and claim 2 and 3 of approval 7 is not yet due.			
Deferred Revenue:			
Advanced payments of up to 90% of the total contract price are received from customers during various stages of the tool's production. The final 10% payment is required upon sign-off of the completed tool. This is where risks and rewards transfer.
