Financial Statements

2020-21

MSSL CONSOLIDATED INC
NOTES TO THE FINANCIAL STATEMENTS

(All amounts in USD'000, unless otherwise stated)

1 Corporate information

MSSL Consolidated Inc (the Company) was incorporated on May 29, 2014 and domiciled in the United States of America. The address of its registered office is 8640 East Market Street, Howland Township, Warren OH 44484, United States.

2 Significant accounting policies
(a) Basic of preparation

Compliance with IFRS

The financial statements of the Company have been prepared for the financial year beginning April 01, 2020 and ended on March 31, 2021.

The financial statements are prepared in accordance with the International Financial Reporting Standards (IFRS) in force at March 31, 2021.

The financial statements have been prepared on a historical cost basis unless otherwise indicated.

The financial statements are presented in USD and all values are rounded to the nearest thousand (\$000), except when otherwise indicated.

(b) Accounting policies for the financial statements

The general accounting policies of the financial statements are described in this section. Detailed accounting policies and descriptions of decisions based on management's judgement and management's use of estimates are presented later at each item of the financial statements.

(i) Current versus non-current classification

The Company presents assets and liabilities in the balance sheet based on current/ non-current classification. An asset is treated as current when it is:

- Expected to be realised or intended to be sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

The Company classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Company has identified twelve months as its operating cycle.

(ii) Foreign currencies

The Company's functional currency is United States Dollar (USD) and the financial statements are presented in USD.

Foreign currency transactions are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at year end exchange rates are generally recognised in profit or loss.

(iii) Cash and cash equivalents

Cash and cash equivalent includes cash on hand, cash at banks and short term deposits with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of change in value. Bank overdrafts are shown within borrowings in current liabilities in the balance sheet.

(iv) Property, Plant and equipment

Property, plant and equipment are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Capital work in progress are stated at cost, net of accumulated impairment losses, if any. Such cost includes expenditure that is directly attributable to the acquisition of the items and the cost of replacing part of the plant and equipment and borrowing costs for long-term construction projects if the recognition criteria are met. When significant parts of plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in profit or loss as incurred.

The cost of self-generated assets comprises of raw material, components, direct labour, other direct cost and related production overheads.

Depreciation methods and useful lives

Depreciation is calculated using the straight-line method over estimated useful lives of the assets:

Assets	Useful lives (years)
Furniture & fixtures	6 years
Computers:	
Server & Networks	3 years
End user devices, such as desktops, laptops, etc.	3 years
Vehicles	4 years

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement of profit and loss when the asset is derecognised.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

2.2 Significant accounting policies

The preparation of financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

Judgements

In the process of applying the Company's accounting policies, there are no significant judgements established by the management.

Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market change or circumstances arising beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

(i) Useful life of property, plant and equipment and investment properties

The Company uses its technical expertise along with historical and industry trends for determining the economic life of an asset/component of an asset. The useful lives are reviewed by management periodically and revised, if appropriate. In case of a revision, the unamortised depreciable amount is charged over the remaining useful life of the assets.

(ii) Taxes

Uncertainties exist with respect to the interpretation of complex tax regulations, changes in tax laws, and the amount and timing of future taxable income. Given the nature of business differences arising between the actual results and the assumptions made, or future changes to such assumptions, could necessitate future adjustments to tax income and expense already recorded. The Company establishes provisions, based on reasonable estimates. The amount of such provisions is based on various factors, such as differing interpretations of tax regulations by the taxable entity and the responsible tax authority. Such differences of interpretation may arise on a wide variety of issues depending on the conditions prevailing in the respective domicile of the Company.

3.1 COVID Impact

The Company has evaluated the impact of COVID-19 resulting from (i) the possibility of constraints to fulfil its performance obligations under the contract with customers; (ii) revision of estimations of costs to complete the contract because of additional efforts; (iii) termination or deferment of contracts by customers. The Company has concluded that the impact of COVID-19 is not material based on these estimates. Due to the nature of the pandemic, the Company will continue to monitor developments to identify significant uncertainties relating to revenue in future periods.
