Notes to the annual accounts
as at December 31, 2019

2. Summary of significant accounting policies (continued)
2.1 Basis of presentation (continued)

Accounting policies and valuation rules are, besides the ones laid down by the Law of 19 December 2002, determined and applied by the Board of Managers.

The preparation of annual accounts requires the use of certain critical accounting estimates. It also requires the Board of Managers to exercise their judgment in the process of applying the accounting policies. Changes in assumptions may have a significant impact on the annual accounts in the period in which the assumptions changed.

Management believes that the underlying assumptions are appropriate and that the annual accounts therefore present the financial position and results fairly.

The Company makes estimates and assumptions that affect the reported amounts of assets and liabilities in the next financial year. Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

2.2 Significant accounting policies

The main valuation rules applied by the Company are the following:

2.2.1. Assets and liabilities

Unless stated otherwise, assets and liabilities have been stated at their historical cost, expressed in EUR.

2.2.2. Debtors

Debtors are valued at their nominal value. They are subject to value adjustments where their recovery is compromised. These value adjustments are not continued if the reasons for which the value adjustments were made have ceased to apply.

2.2.3. Foreign currency Translation

Monetary assets and liabilities are translated at the exchange rates effective at the balance sheet date whereas non-monetary items are converted at the exchange rate effective at the date of the transaction. The realized and unrealized exchange losses are recorded in the profit and loss account. The unrealized exchange gains are recorded in a regularization account, whereas the realized exchange gains are recorded in the profit and loss account at the moment of their realization.

When there is an economic link between an asset and a liability, these are valued in total according to the method described above and the net unrealized losses are recorded in
PROJECT DEL HOLDING S.à r.l.

Notes to the annual accounts
as at December 31, 2019

2.2.3. Foreign currency translation (continued)
